Work Experience

Ensuesoft Private Limited – Mohali

Nov 2022 – Present

Web designer

- As a UI Developer at Ensuesoft Pvt Ltd, I've worked on over serval projects, ranging from startups to multi-billion-dollar companies, delivering intuitive, user-centered designs and seamless digital experiences
- From wireframing and prototyping to front-end development, I have designed and built websites and software applications, ensuring a cohesive user journey across all platforms. I utilized React and other frameworks to design and develop responsive, interactive, and scalable web solutions
- Collaborated closely with designers, developers, and stakeholders to translate business requirements into intuitive and high-performing user interfaces

Projects

ISTS

- Worked on the front-end development of the ISTS website, focusing on creating a user-friendly and responsive design
- Implemented intuitive interfaces to improve the overall user experience for visitors
- Ensured seamless functionality across devices, enhancing accessibility and ease of navigation

Nubble

- Developed Nubble, an intuitive management software to streamline business operations.
- Simplified bureaucratic, administrative, and logistical challenges.
- Enhanced operational efficiency and improved overall workflow management.

Tutors

- Designed and developed the front-end of a tutors platform for seamless tutor-student interaction.
- Implemented separate login for tutors and students for a seamless experience.
- Implemented separate dashboards for tutors and students for a tailored experience.
- Ensured responsive design for seamless use across different devices.

Education

Kurukshetra university – Haryana

2022

Bachelor of Computer Science (Bsc.cs)
